University of Balochistan, Pakistan (www.uob.edu.pk)

3.56 out of 4.0

Tour and Travel Agency

The goal of this project is to design and develop an online booking system for a Tour and Travel agency that will allow customers to book their preferred tour packages and related services via a user-friendly interface. The traditional method of booking Tours and Travel packages has several disadvantages, including limited accessibility, time-consuming, limited payment options, inefficient inventory management, a lack of real-time updates, and inconvenience and dissatisfaction. Customers must physically visit the travel agency's offices to book their travel packages, which results in overbooking.

WORK EXPERIENCE

Jan 2023 – Present*

Employer

Achievements

IT Assistant

Honorary Consul of Federal Republic of Germany in Quetta (Quetta, Balochistan)

- Provided technical support for hardware, software, and network issues.
- Assisted with system administration, including updates, backups, and user account management.
- Collaborated with management staff on various official events.
- Composed official correspondence and managed communication.
- Maintained accurate records of IT assets and configurations.

Mar 2021 – Dec 2022

Employer

Achievements

IT Officer / IT Support

Balochistan Rural Development Society (Part-Time)

- Technical assistance with the organization's computer systems was provided to staff.
- Installed, configured, and maintained computer hardware and software for the organisation.

 - awarded me their merit-based scholarship, BEEF is Pakistani Merit Based Scholarship, which is
- 2020 - 2021
 - specifically designed for students who are currently enrolled in academic programmes.

University mini-projects

Project title	Newsfeed (Web-Application)
Framework	Flask (Python)
Duration (Specialization)	5 weeks (Web Development, Flask, Python, Dynamic URLs, HTML, CSS, JavaScript, Jinja 2, MYSQL, Debugging, SQL Alchemy, APIs, CMS)

Project Abstract Newsfeed is a dynamic web application that provides users with comprehensive and up-to-date news. Users are given a personalised news feed based on their preferences, ensuring that they are kept up to date on the latest news stories that are relevant to them. The application is built with modern web technologies like Flask, HTML, CSS, JavaScript, Jinja, and MYSQL, resulting in a fast and responsive user interface. The application is also designed to be scalable, ensuring that it can handle a large number of users and news articles.
